

SERVICE OF ROTATING PROCESS MACHINES

THE COMPANY

Has its history since 1945 with head office in Gothenburg, Sweden throughout the years. With the new leadership in place since 1991, the company has developed into a company not only supplying equipment, but also designing and assembling our own customized systems of rotary lobe blowers and compressors sold on export to many parts of the world.

SERVICE, MAINTENANCE & SPARE PARTS

An important part of our business is to provide service and parts for the equipment both that we sell today and from the past, and also many of the other brands with same technology that our clients are in possession of.

This service can be performed in various ways:

- In our work shop
- On site with end user
- Service and maintenance agreements depending on the client's specific needs

Our personnel are educated and kept up to date through sub suppliers and internal theoretical education as well as practical experience and transfer of knowledge out in the field which is not possible to gain theoretically.

MACHINE TYPES

We handle service of equipment within the following general types:

- Rotary lobe blowers
- Screw & Piston Pumps
- Piston compressors
- Membrane compressors

Rotary lobe blowers

Our specialty area lies within lobe type blowers also commonly referred to as "roots type".

Examples of brands:

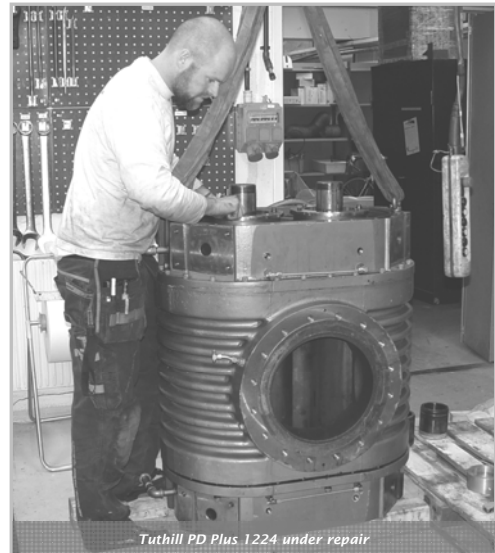

- Tuthill
- Dresser / Holmes
- Aerzener, Delta Pak
- Robuschi, Robox
- Kaeser
- Hibon

We are however not limited to these brands.

Diaphragm compressors

Reciprocating, leak tight and contamination free compressors from Howden BC Compressors who are our partners for sales in Sweden. Formerly known as Burton Corblin.

Screw pumps / piston pumps

Within this field we mainly work with the two brands that we represent currently:

- KRAL (*three spindle screw pumps*)
- Myers (*piston pumps*)

We also have long experience in servicing of our previous brand in the screw pump range:

- Bornemann (*two spindle screw pumps*)

Piston compressors

For these heavy duty piston compressor packages we today represent company Howden BC Compressors, formerly known as company and brand Burton Corblin with factory and headquarters just north of Paris.

In addition to this we are also accredited service partners for SIAD Macchine Impianti in Italy for their range of piston compressor products.
